BANDIT

Product Catalog

Forged by Tradition

More than 150 years ago, the first revolvers and lever action rifles changed the course of firearm history. These legendary designs quickly became trusted companions of pioneers, hunters, ranchers and lawmen across the American frontier.

They were tools of survival, symbols of independence and a reflection of the rugged spirit that defined the Old West.

Today, that legacy still lives on.

At Bandit Firearms we respect the origins of these timeless platforms while bringing them into the modern era. By combining classic designs with modern manufacturing and engineering, we recreate the character of traditional firearms with the reliability and precision expected today.

Every Bandit firearm is built with a deep respect for the past and a clear vision for the future. Lever actions and revolvers are not simply mechanical systems. They represent history, craftsmanship and a tradition that has endured for generations.

Bandit continues that story by refining these iconic platforms for today's shooters while preserving the heritage that made them legendary.

REVOLVER
Rifle Series

The Bandit Revolver Rifle Series combines the heritage of classic revolvers with the stability of a rifle platform. Designed for shooters who appreciate tradition, versatility and timeless firearm design.
